

Easy Configuration

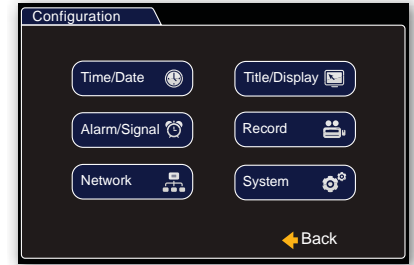

Personalizing the DVR to your workflow

Easy Configuration

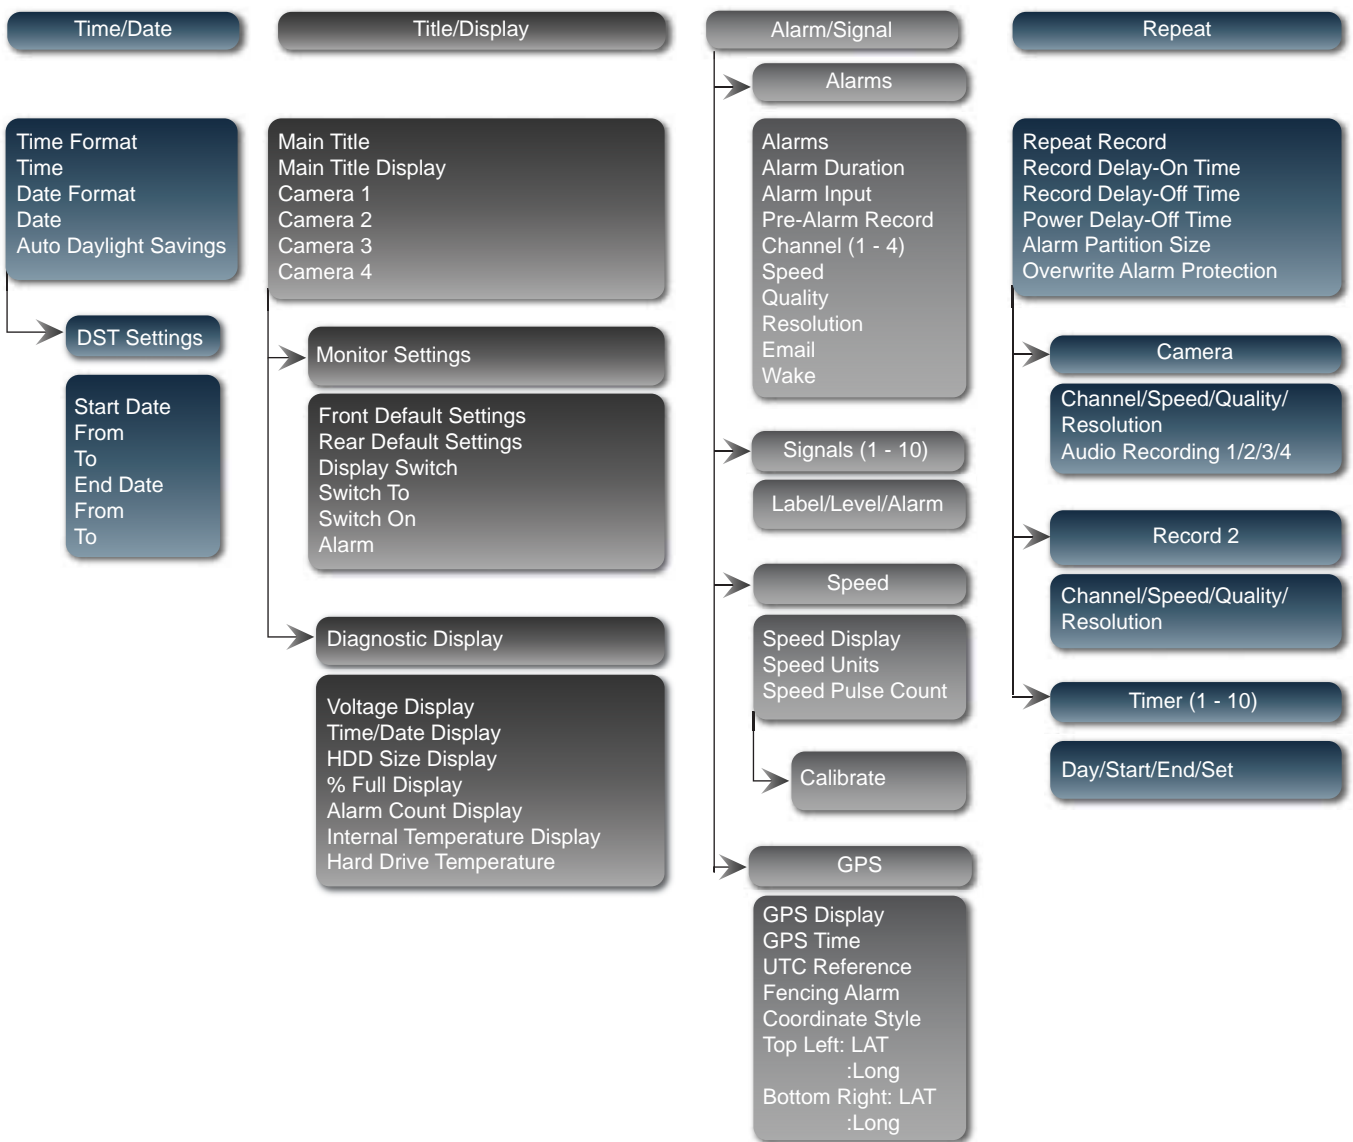

The new Trooper® and Explorer® DVR range now comes with a graphical configuration interface to make personalizing the DVR settings a whole lot quicker and easier for the installer. As you can see by the diagram below, the system's powerful functionality enables you to program the DVR to fit the way you work. To make life even easier, once you configure one DVR, you can save its settings on to a USB stick to plug into other DVRs in your fleet, enabling you to load the settings very quickly, allowing you to save installation time and costs.

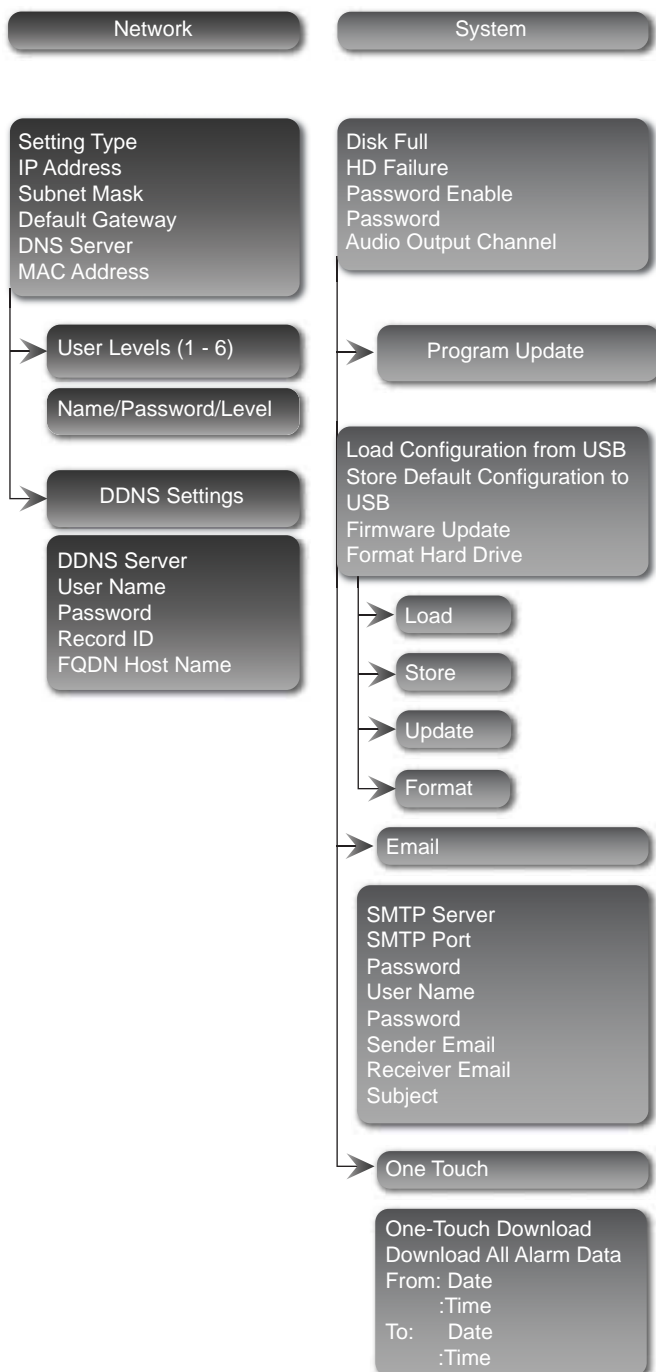

Graphical Interface: Configuration is made easy with a new graphical interface.

Personalized Settings: You can personalize the DVR settings using this easy to use menu.

Devices For Configuring With

To configure the DVR, you can either connect an LCD monitor or laptop PC, or do it wirelessly via Smart-Reach™.
